HEAVY DUTY

**FAST MOVING
PARTS**

**UNQUESTIONABLE QUALITY YOU CAN COUNT ON...
DENSO'S REMANUFACTURED STARTERS & ALTERNATORS**

From an Original Equipment Supplier:

- Precision built and engineered for exact replacement.
- Only supplier who remanufactures and tests to the strictest original equipment specifications.
- Excellent fill rates and one of the lowest warranty return rates in the industry.
- If the remanufactured component does not meet our stringent specifications, it is replaced with a factory-new component!

INDUSTRIAL APPLICATIONS

SEQ	PART NUMBER	OE PN	PART DESCRIPTION	OE	V	KW/A	ENGINE	APPLICATION
1	280-7002	28100-20553-71	STARTER	Toyota	12	1.4	5P	Lift Truck
2	9742809-093	25-39316-00	STARTER	Carrier Transicold	12	2.0	V2203	Reefer

REMAN

FEATURES / BENEFITS

- Remanufactured using the latest technological advances and product upgrades
- Every core goes through a rigorous quality control process prior to being accepted for remanufacturing
- Highest quality replacement components and OE-standard lubricants creating one of the best values in the market
- All units are subjected to rigorous safety and performance tests
- All starters are 100% load tested. All Alternators are 100% load and no-load tested

STARTERS

Hardware	Replaced if worn or damaged. 100% Re-plated (Trivalent Chromate finish).
Yoke/Field Coil	Replaced if worn or damaged. Inspected and performance tested and yoke is repainted.
Front Housing	Replaced if worn or damaged with new components as needed. Cleaned inspected and re-tapped to OE specifications.
Armature	Replaced if worn or damaged. Commutator 100% polished, gauged and performance tested.
Clutch Assembly	Replaced if worn or damaged. Cleaned, torque tested and re-lubricated to OEM grease specifications.
Solenoid Housing	Replaced if worn or damaged. Cleaned, inspected and re-tapped to OE specifications. Bearing seat gauged.
Solenoid Coil	Replaced if worn or damaged. Inspected and performance tested.
Brush Holder	Replaced if worn or damaged. Cleaned and inspected.
Brushes	Replaced if worn or damaged.
Rear Cover	Replaced if worn or damaged. 100% re-plated (Trivalent Chromate finish).
Gaskets	Replaced if worn or damaged.
Plunger Assembly	Contact replaced if worn or damaged. Cleaned and re-finished.
Contact Plates	100% new and updated to current specifications.
Terminal Bolts	Inspected and replaced if worn or damaged. 100% copper plated.
Bearings	Checked and re-greased to OEM spec or replaced if worn or damaged.
Testing	Load & no-load testing performed based on OE performance curves.

ALTERNATORS

Hardware	Replaced if worn or damaged. 100% Re-plated (Trivalent Chromate finish).
Housing	Replaced if worn or damaged with new component as needed. Cleaned, inspected, and re-tapped to OEM specifications.
Rotor	Replaced if worn or damaged with component as needed. Continuity performance tested and 600 volt insulation tested.
Rotor Slip Ring	100% Re-machined & controlled to OE specifications to control brush wear.
Pulley	Replaced if worn or damaged. Checked for damage and is repainted.
Bearing	Tested and replaced as necessary.
Stator	Replaced if worn or damaged with new component as needed. 600 volt insulator tested.
Terminal Insulator	Replaced if worn or damaged with new component as needed.
Brushes, Springs & Brush Holder	100% new and updated to current specifications. Replaced with new components.
Voltage Regulator	100% performance tested replaced if damaged.
Rectifiers/Diodes	Replaced if worn or damaged. 300 volt performance tested to OEM specifications.
Rear Cover	Replaced if worn or damaged. Repainted to OEM specifications.
Testing	Load testing performed based on OE performance curves.

All replacement component parts are genuine DENSO components.
